

ACTIVITY WATER STARLIFE

*Why
drink
pure
water?*

- Contributes to overall health
- Supplies energy
- Improves sleep
- Supports the immune system
- Harmonizes metabolism
- Ensures better blood circulation
- Ensures deeper detoxification of the organism
- Quickly destroys free radicals
- Maintains a healthy pH of the body
- Hydrates up to 6 times better than normal water
- Excellently distributes vitamins and nutrients
- Contributes to regular stool
- Optimizes intestinal function
- Reduces the risks of civilization diseases

*A person is what water
he chooses to drink.*

What water to drink? Only one answer exists – clean water.

The water must be clean, because if it contains any harmful substances, it will be transported to the furthest corners of our organism.

What's special on the AWS?

It's not just a carbon water filter. It's a complex device that includes other components:

Osmotic membrane (Pore diameter 0,0001 µm)

The heart of the whole system. The reverse osmosis process removes biological and chemical contaminants, bacteria, viruses (AWS membrane pores are 5,000 times smaller than the average bacteria) → only clean water and necessary minerals pass.

Redox (ORP -300 mV to -400 mV, pH 8,5 to pH 9,5)

- Eliminates dangerous free radicals
- Increases the pH of water
- Reduces its redox water potential

Mineraliser

It enriches water with magnesium, potassium, calcium and sodium in a balanced ratio.

Magnetiser (Magnetic flux density 7.000 GS)

Optimizes water structure and reduces its surface tension.

More detailed information about AWS and all its components can be found at www.starlife.eu in ACTIVITY WATER STARLIFE section.
